22 General government financing	3.0	-	-	2.5	-	-	0.2	-	-	4.4	-	-	-

(1) Debt compiled according to the definition of the Excessive Deficit Procedure (Regulation (CE) 479/2009, of 25 May), i.e., general government consolidated gross debt at nominal or face value (Maastricht debt). It includes the liabilities in currency and deposits (AF.2), debt securities (AF.3) and loans (AF.4). In the table, the debt of general government is consolidated within this sector, therefore including only its liabilities vis-à-vis the other sectors of the economy.

(2) The nominal GDP figures used for the calculation of the ratios are published by Instituto Nacional de Estatística (INE). For the latest quarter, and when such figure is not available, an extrapolation for the nominal GDP of this quarter is performed, based on partial information disseminated by INE. Therefore, the estimate takes into account the GDP of the same quarter of the previous year, the published year-on-year change rate in volume for the latest quarter, and the last published figure for the year-on-year growth rate of the GDP deflator. For the series on stocks, the nominal GDP used in the calculation of the ratios corresponds to the accumulated amount since the beginning of the year until the quarter to which the figures relate.

(3) Change of liabilities in the form of deposits, securities and loans obtained from residents and non-residents, and other accounts payable obtained from non-residents, net of investments in assets in the form of deposits and securities with MFIs residents and non-residents, and of securities, loans and other credit facilities with non-residents.

(4) Includes universal banks, savings banks and mutual agricultural credit banks which, along with money market funds, are the subsector of Other monetary financial institutions (OMFIs).

(5) Includes Non-monetary financial institutions, Non-financial corporations and Households.
