

STATISTICAL PRESS RELEASE

76 | 2017

Banking loans and deposits

June 2017

8 August 2017

Today, Banco de Portugal publishes statistics, in Table [A.9](#) of the *Statistical Bulletin* and in *BPstat*, on banking loans and deposits of non-financial corporations and households for June 2017.

These data incorporate revisions made since December 2014, chiefly reflecting new data relating to the identification of counterparties and purposes of the loans.

Loans

In June 2017, loans granted by banks to non-financial corporations and households (for house purchase) continued to post negative annual rates of change, which stood at -3.3% (-2.6% in May) and -2.5% (-2.6% in May) respectively (Chart 1). The decline in the annual rate of change of non-financial corporations is largely due to credit

granted during the month under review.

For the euro area as a whole, the annual rate of change of loans to non-financial corporations and households (for house purchase) stood at 1.3% and 3.3% respectively, compared with 1.6% and 2.9% in May.

Household deposits

Household deposits with resident banks totalled €139.2 billion at the end of June 2017, reflecting an annual rate of change of -1.0%, compared with -0.6% in May.

In the euro area, the annual rate of change of household deposits was 3.8% in June, slightly lower than the 3.9% registered in the previous month.

Chart 1 • Loans to non-financial corporations and households (housing) – a.r

Chart 2 • Deposits of households – a.r.
