

## STATISTICAL PRESS RELEASE

102 | 2016

# National financial accounts 2nd quarter 2016

October 13th, 2016

Banco de Portugal publishes today, in table A.6 of the Statistical Bulletin and in *BPstat*, national financial accounts data for the second quarter 2016.

For the year ending in the second quarter 2016 and following a pattern observed since the end of 2012, the Portuguese economy displayed net lending vis-à-vis the rest of the world, with a value of 1.2 per cent of GDP.

The Portuguese economy net lending reflected the financial saving of financial corporations, of households and of non-financial corporations (respectively 3.2, 0.8 and 0.6 per cent of GDP). This saving was more than enough to satisfy the borrowing needs of general government amounting to 3.4 per cent of GDP (Chart 1).

The non-financial corporations and financial corporations net financial assets had an annual growth of, respectively, 4.6 and 3.1 per cent of GDP, reflecting the respective financial saving.

Despite the net borrowing in the period, the net financial assets of general government increased by 2.3 per cent of GDP, due to the positive effect on this ratio of the PIB growth and the net effect of revaluations of financial assets and liabilities.

In the end of the second quarter 2016, the Portuguese economy had net financial assets vis-à-vis the rest of the world of -105.6 per cent of GDP (Chart 2), higher than the -108.4 per cent of GDP recorded at the end of the previous quarter. The improving trend has been observed since the beginning of 2014, with a brief interruption/pause in early 2015.
