Securities Issues January 2016

March 11th, 2016

Banco de Portugal publishes today, in table A.12 of the Statistical Bulletin and in *BPstat*, shares and debt securities issues data for January 2016.

At the end of January 2016, the resident' securities net issues (gross issues minus redemptions) amounted to 1.0 billion euros, with debt securities having the highest contribution, reaching 0.9 billion euros (Chart 1).

Concerning the breakdown by institutional sector, the most relevant contributions are originated by

the general government, with a positive contribution of 2.5 billion euros, and by the financial corporations, with a negative contribution of -1.4 billion euros (Chart 2).

Notwithstanding the month's positive net issues, the outstanding amount of securities issued by residents decreased 2.9 billion euros, to an amount of 417.4 billion euros at the end of January 2016 (Chart 3), mainly due to devaluations of debt securities issued by general government and of listed shares issued by non-financial corporations.
