Securities Issues July 2016

September 9th, 2016

Banco de Portugal publishes today, in table A.25 of the Statistical Bulletin and in *BPstat*, data on shares and debt securities issues for July 2016.

In July 2016, net securities issued (gross issues minus redemptions) by residents amounted to -0.1 billion euros (Chart 1). This value is explained mainly by net issues of short and long term debt securities of 2.2 and -2.1 billion euros respectively.

Concerning the breakdown by institutional sector, the highlights go to the general government with

net issues of 0.5 billion euros and to the financial sector with net issues of -0.6 billion euros (Chart 2).

The outstanding amount of securities issued by residents at the end of July was 431.2 billion euros. This value corresponds to an increase of 3.3 billion euros relative to June (Chart 3), mainly as a result of the valuation of 2.3 billion euros of listed shares, mostly in the non-financial sector, as well as due to the valuation of general government debt (1.2 billion euros).
