

## STATISTICAL PRESS RELEASE

129 | 2016

### Securities Issues

October 2016

December 9th, 2016

Banco de Portugal publishes today, in table [A.25](#) of the Statistical Bulletin and in *BPstat*, data on shares and debt securities issues for October 2016.

In October, net securities issued (gross issues minus redemptions) by residents amounted to -3.2 billion euros (Chart 1). This outcome is a result of net issues in debt securities of -2.7 billion euros, the lowest value since June 2015.

Financial corporations and the general government were the sectors which contributed the most to the

overall result with net issues of -1.7 and -1.6 billion euros, respectively (Chart 2). In both cases the most important values are related to the long term debt securities market.

In October, the outstanding amount of securities issued by residents decreased 2.7 billion euros, to 427.3 billion euros (Chart 3), influenced by the negative net issues and the valuation of shares issued by non-financial corporations.

**Chart 1 • Securities issues, by instrument | net issues**

**Chart 2 • Securities issues, by institutional sector | net issues**

**Chart 3 • Securities issues, by instrument | end-of-month outstanding amount**

**Chart 4 • Securities issues, by institutional sector | end-of-month outstanding amount**
