Banking loans and deposits

May 2016

July 12th, 2016

Banco de Portugal publishes today in table A.9 of the Statistical Bulletin and in *BPstat*, statistics on banking loans and deposits vis-à-vis non-financial corporations and households for May 2016.

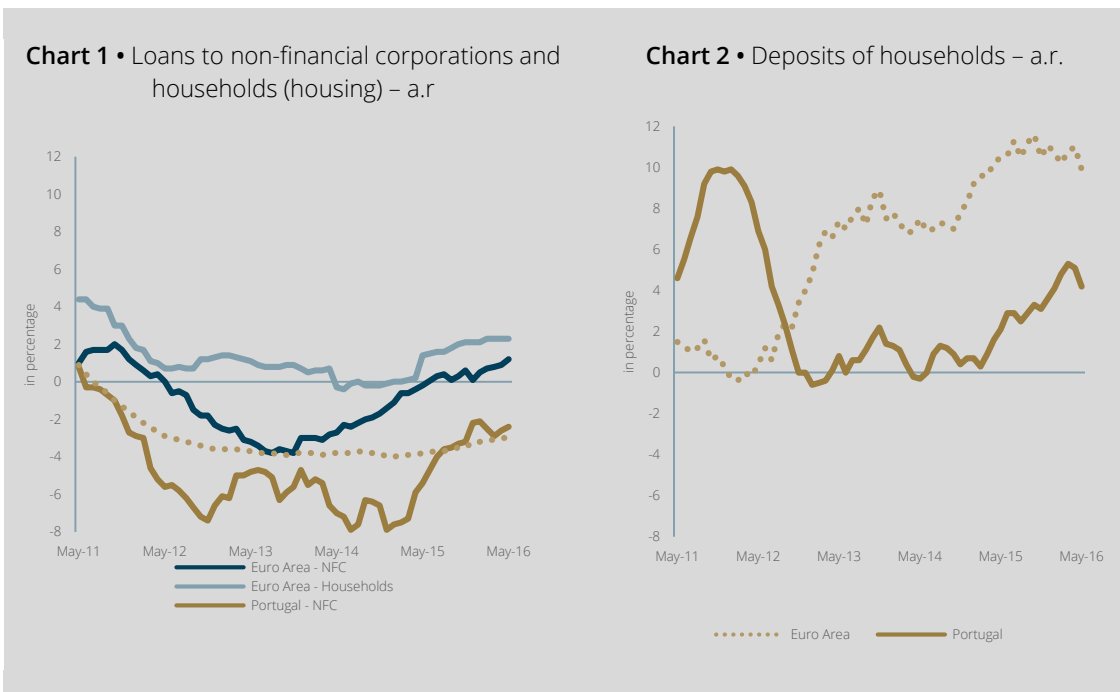

Loans

In May 2016, the loans granted to non-financial corporations and households continued to show negative annual rates of change (a.r.), which stood respectively at -2.4% and -3.0% (Chart 1), compared with

-2.6% and -3.0%, respectively, in the previous month.

Deposits

In May, the households' deposits placed with resident banks decreased by 145 million euros, adding to 139.4 billion euros at the end of the month. This decrease reflected a slowdown in the a.r. from 5.1% in April to 4.2% in May (Chart 2).
