

# STATISTICAL PRESS RELEASE

## Non-financial sector indebtedness

### January 2016

32 | 2016

March 21<sup>st</sup>, 2016

Banco de Portugal publishes today, in table A.20 of the Statistical Bulletin and in *BPstat*, the non-financial sector indebtedness statistics for January 2016.

In January 2016, the non-financial sector indebtedness amounted to 700.3 billion euros, an increase of 2.9 billion euros when compared with the previous month.

The growth of the non-financial sector indebtedness was due to an increase of 3.7 billion euros of the non-financial public sector indebtedness, reaching 297.7 billion euros (Chart 1). This rise was mainly due

to the evolution of the financing granted by the financial sector, the non-residents and the general government (Chart 2).

The private sector indebtedness decreased 0.8 billion euros when compared to December 2015, now amounting to 402.6 billion euros. This evolution reflects the decrease in the indebtedness of private corporations and private individuals *vis-à-vis* the financial sector.
