

## STATISTICAL PRESS RELEASE

88 | 2016

# Non-financial sector indebtedness June 2016

August 22<sup>nd</sup>, 2016

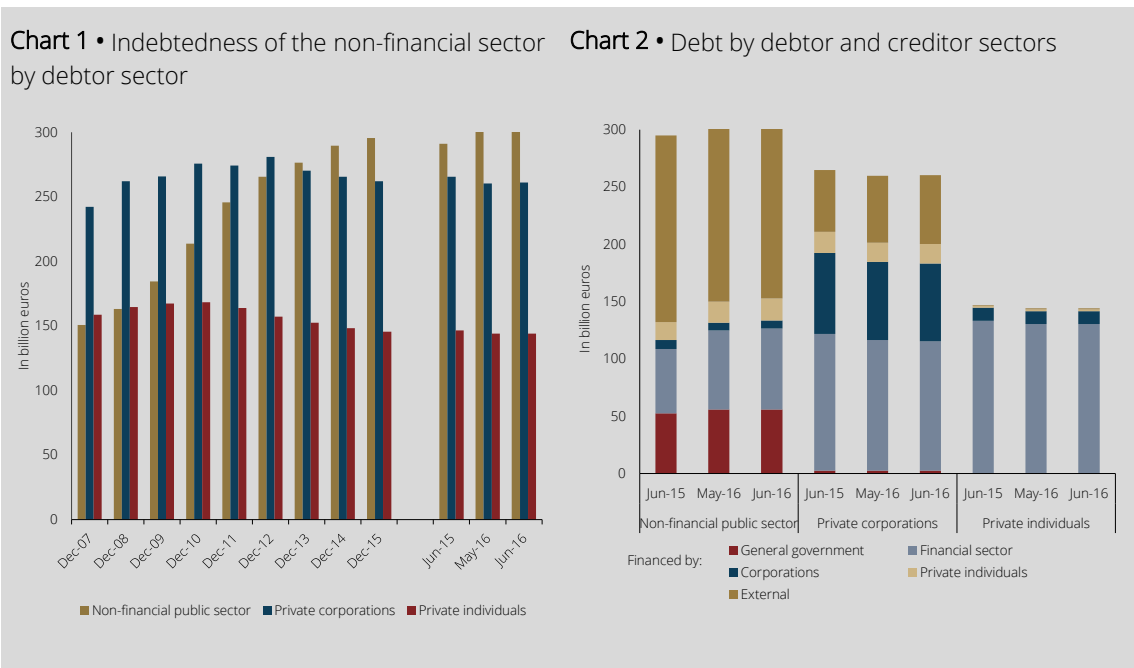

Banco de Portugal publishes today, in table A.20 of the Statistical Bulletin and in *BPstat*, the non-financial sector indebtedness statistics for June 2016.

In June 2016, the non-financial sector indebtedness amounted to 710.3 billion euros, of which 305.2 billion euros refers to the public sector and 405.1 billion euros to the private sector.

Comparing with May, there was an increase of 2.6 billion euros which was mainly due to the increase of

2.0 billion euros of the non-financial public sector indebtedness (Chart 1). This evolution, as in previous months, mainly reflected the increase of the indebtedness vis-à-vis the financial sector (Chart 2).

The private sector indebtedness increased 0.6 billion euros when compared with May, as a result of the increase in external indebtedness of private corporations (1.0 billion euros). The indebtedness vis-à-vis the financial sector decreased 0.2 billion euros.
