## Non-financial sector indebtedness

### July 2016

96 | 2016

September 21<sup>st</sup>, 2016

Banco de Portugal publishes today, in table A.20 of the Statistical Bulletin and in *BPstat*, the non-financial sector indebtedness statistics for July 2016.

In July 2016, the non-financial sector indebtedness amounted to 710.8 billion euros, of which 305.9 billion euros refers to the public sector and 404.9 billion euros to the private sector.

Comparing with June, the non-financial sector indebtedness increased 0.5 billion euros due to the increase of 0.7 billion euros of the non-financial public sector indebtedness (Chart 1). This evolution, as in previous

months, mainly reflecting the increase of the indebtedness vis-à-vis the financial sector (Chart 2).

The private sector indebtedness decreased 0.2 billion euros when compared with June, as a result of the reduction of 0.5 billion euros in the indebtedness vis-à-vis the resident financial sector. This evolution was partially offset by an increase of external indebtedness (0.3 billion euros).
