

STATISTICAL PRESS RELEASE

Non-financial sector indebtedness

August 2016

107 | 2016

October 20th, 2016

Banco de Portugal publishes today, in table A.20 of the Statistical Bulletin and in *BPstat*, the non-financial sector indebtedness statistics for August 2016.

In August 2016, the non-financial sector indebtedness amounted to 719.5 billion euros, of which 310.0 billion euros refers to the public sector and 409.5 billion euros to the private sector.

Comparing with July, the non-financial sector indebtedness increased 2.0 billion euros due to the increase of 3.0 billion euros of the non-financial public

sector indebtedness (Chart 1). This evolution mainly reflect the increase of the indebtedness vis-à-vis the private individuals, the financial sector and the general government (Chart 2).

The private sector indebtedness decreased 1.0 billion euros when compared with July, as a result of the reduction in the indebtedness vis-à-vis the resident financial sector (0.7 billion euros) and the decrease of the external indebtedness (0.3 billion euros).
