

STATISTICAL PRESS RELEASE

Non-financial sector indebtedness

September 2016

118 | 2016

November 21st, 2016

Banco de Portugal publishes today, in table A.20 of the Statistical Bulletin and in *BPstat*, the non-financial sector indebtedness statistics for September 2016.

In September 2016, the non-financial sector indebtedness amounted to 720.3 billion euros, of which 310.4 billion euros refers to the public sector and 409.9 billion euros to the private sector.

Comparing with August, the non-financial sector indebtedness increased 0.7 billion euros due to a similar increase in the indebtedness of the public sector and the private sector (Chart 1).

The evolution of the public sector indebtedness was mainly due to the increase of the external indebtedness, that was partially offset by a decrease of the indebtedness vis-à-vis the general government (Chart 2).

The increase of the private sector indebtedness was a result of the evolution in the private corporations indebtedness, that was partially offset by a reduction in private individuals.
