

STATISTICAL PRESS RELEASE

General government financing

June 2016

87 | 2016

August 22nd, 2016

Banco de Portugal publishes today in table A.15 of the Statistical Bulletin and in *BPstat*, the statistics of general government financing of June 2016.

The general government financing in the first semester of 2016 stood at +2.7 billion euros, which compares with +3.6 billion euros in the same period of 2015 (Chart 1).

The amount of the general government financing was the result of an increase of the financing granted by banks (+3.6 billion euros) and by other resident

sectors (+6.7 billion euros), offset by a reduction in the financing granted by non-residents (-7.6 billion euros), through the reduction of debt securities (-5.6 billion euros) and the early reimbursement of IMF loans in February 2016 (-2.0 billion euros) (Chart 2).

By financial instrument, net positive issuances of securities of 8.9 billion euros were recorded, partially compensated by a reduction of 6.2 billion euros in loans net of deposits.
