

STATISTICAL PRESS RELEASE

General government financing

July 2016

95 | 2016

September 21st, 2016

Banco de Portugal publishes today in table A.15 of the Statistical Bulletin and in *BPstat*, the statistics of general government financing of July 2016.

The general government financing between January and July 2016 stood at +5.2 billion euros, which compares with +5.8 billion euros in the same period of 2015 (Chart 1).

The amount of the general government financing was the result of an increase of the financing granted by banks (+6.1 billion euros) and by other resident

sectors (+6.8 billion euros), offset by a reduction in the financing granted by non-residents (-7.7 billion euros), through the reduction of debt securities (-5.1 billion euros) and the early reimbursement of IMF loans in February 2016 (-2.0 billion euros) (Chart 2).

By financial instrument, net positive issuances of securities of 9.7 billion euros were recorded, partially compensated by a reduction of 4.5 billion euros in loans net of deposits.
