

STATISTICAL PRESS RELEASE

General government financing

November 2016

9 | 2017

January 19th, 2016

Banco de Portugal publishes today in table [A.15](#) of the *Statistical Bulletin* and in *BPstat*, the statistics of general government financing of November 2016.

The general government financing between January and November 2016 stood at 5.3 billion euros, which compares with 5.5 billion euros in the same period of 2015 (Chart 1).

The general government financing granted by banks and by other resident sectors amounted to 8.6 billion euros and 10.3 billion euros, respectively. This

was offset by a reduction in the financing granted by non-residents of 13.7 billion euros, mainly through the reduction of debt securities of 8.9 billion euros and the early reimbursement of IMF loans of 4.1 billion euros (Chart 2).

By financial instrument, net positive issuances of securities of 12.4 billion euros were recorded, partially compensated by a reduction of 7.1 billion euros in loans net of deposits.
