Today, Banco de Portugal publishes statistics, in Table [A.15](#) of the *Statistical Bulletin* and in *BPstat*, on general government financing for April 2017.

From January to April 2017, general government financing stood at €2.1 billion, compared with €1.3 billion in the same period a year earlier (Chart 1).

Financing granted to the general government by banks and other resident sectors stood at €0.4 bil-

lion and €2.9 billion respectively. By contrast, financing granted by non-residents stood at €-1.2 billion, mostly reflecting the early repayment of IMF loans of €1.7 billion in February 2017 (Chart 2).

Financing through securities amounted to €5.6 billion, which more than offset the €3.5 billion reduction in loans net of deposits.
