

STATISTICAL PRESS RELEASE

10 | 2017

Non-financial sector indebtedness November 2016

January 19th, 2017

Banco de Portugal publishes today, in table [A.20](#) of the *Statistical Bulletin* and in *BPstat*, the non-financial sector indebtedness statistics for November 2016.

In November 2016, the non-financial sector indebtedness amounted to 717.2 billion euros, of which 309.2 billion euros refers to the public sector and 408.0 billion euros to the private sector.

Comparing with October, the non-financial sector indebtedness decreased 0.9 billion euros due to the decrease of 0.6 billion euros in the indebtedness of the public sector and 0.3 billion euros in the indebtedness of the private sector (Chart 1).

The public sector indebtedness decreased due to the reduction of the external indebtedness that was partially offset by an increase of the indebtedness vis-à-vis the other sectors, particularly the financial sector and private individuals (Chart 2).

The decrease of the private sector indebtedness was a result of the reduction in the indebtedness vis-à-vis the resident financial sector (0.6 billion euros) although the external indebtedness of corporations has increased.
