

## STATISTICAL PRESS RELEASE

61|2017

# Non-financial sector indebtedness April 2017

22 June 2017

Today, Banco de Portugal publishes statistics, in Table [A.20](#) of the *Statistical Bulletin* and in *BPstat*, on non-financial sector indebtedness for April 2017.

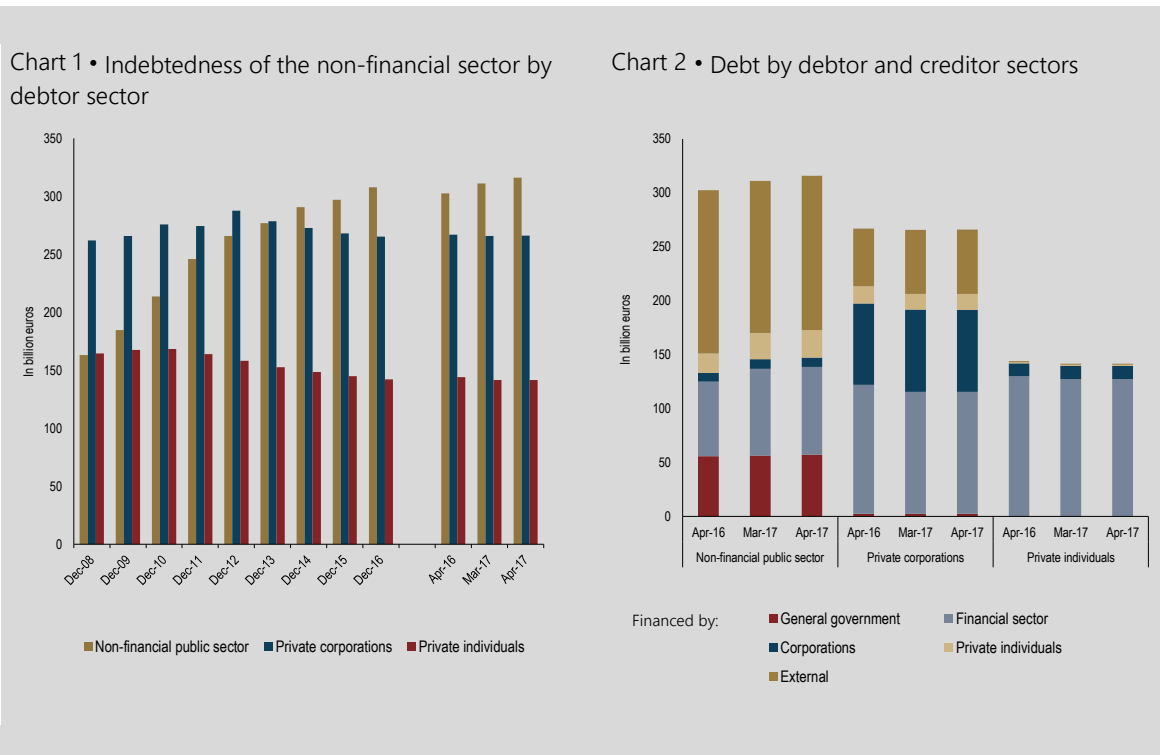

In April 2017, non-financial sector indebtedness stood at €723.6 billion, of which €315.9 billion referred to the public sector and €407.7 billion to the private sector.

Compared with March 2017, public sector indebtedness increased by €4.8 billion and private

sector indebtedness increased by €0.2 billion (Chart 1).

The increase in public sector indebtedness is due to the rise in financing granted by all creditor sectors, with the exception of the corporate sector (Chart 2).

The growth in private sector indebtedness reflects the increase in the external indebtedness of private corporations, partially offset by a decrease in indebtedness vis-à-vis the resident financial sector.
