

STATISTICAL PRESS RELEASE

83|2017

Non-financial sector indebtedness June 2017

22 August 2017

Today, Banco de Portugal publishes statistics, in Table [A.20](#) of the *Statistical Bulletin* and in *BPstat*, on non-financial sector indebtedness for June 2017.

At the end of the first half of 2017, non-financial sector indebtedness stood at €726.0 billion, of which €317.7 billion referred to the public sector and €408.3 billion to the private sector.

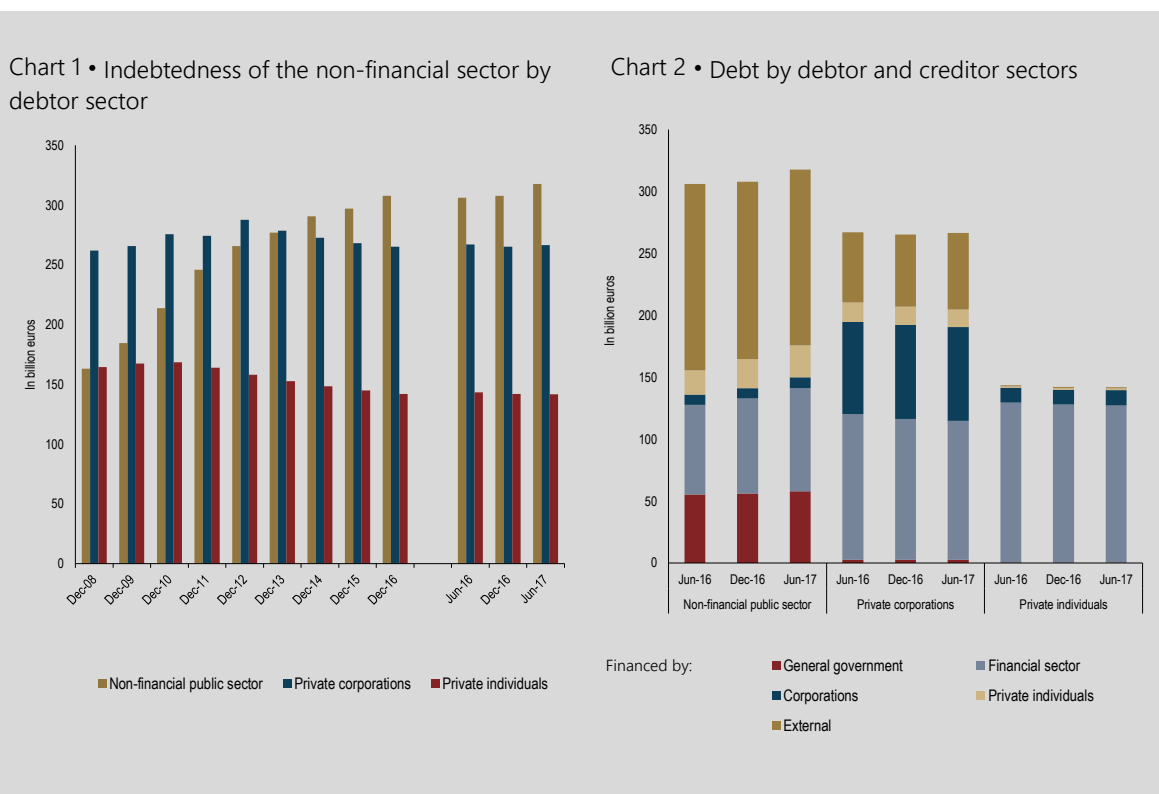

Compared to the end of 2016, non-financial sector indebtedness increased by €10.9 billion, of which €9.9 billion referred to the public sector and €1.0 billion to the private sector (Chart 1).

The increase in public sector indebtedness was chiefly due to a rise in financing obtained from the financial sector (€6.5 billion) and households (€2.3 billion).

However, all financing sectors increased their financing to the public sector, except the non-resident sector (Chart 2).

Developments in the private sector indebtedness mainly reflect a rise in the indebtedness of private corporations (€1.3 billion), with special reference to the increase of €3.5 billion in the non-resident financing, partly offset by a decline in credit obtained by private corporations from the financial sector and other resident sectors.

Household indebtedness declined by €0.3 billion, mainly the financing obtained from the financial sector.
