

## STATISTICAL PRESS RELEASE

91 | 2017

# Non-financial sector indebtedness July 2017

21 September 2017

Today, Banco de Portugal publishes statistics, in Table [A.20](#) of the *Statistical Bulletin* and in *BPstat*, on non-financial sector indebtedness for July 2017.

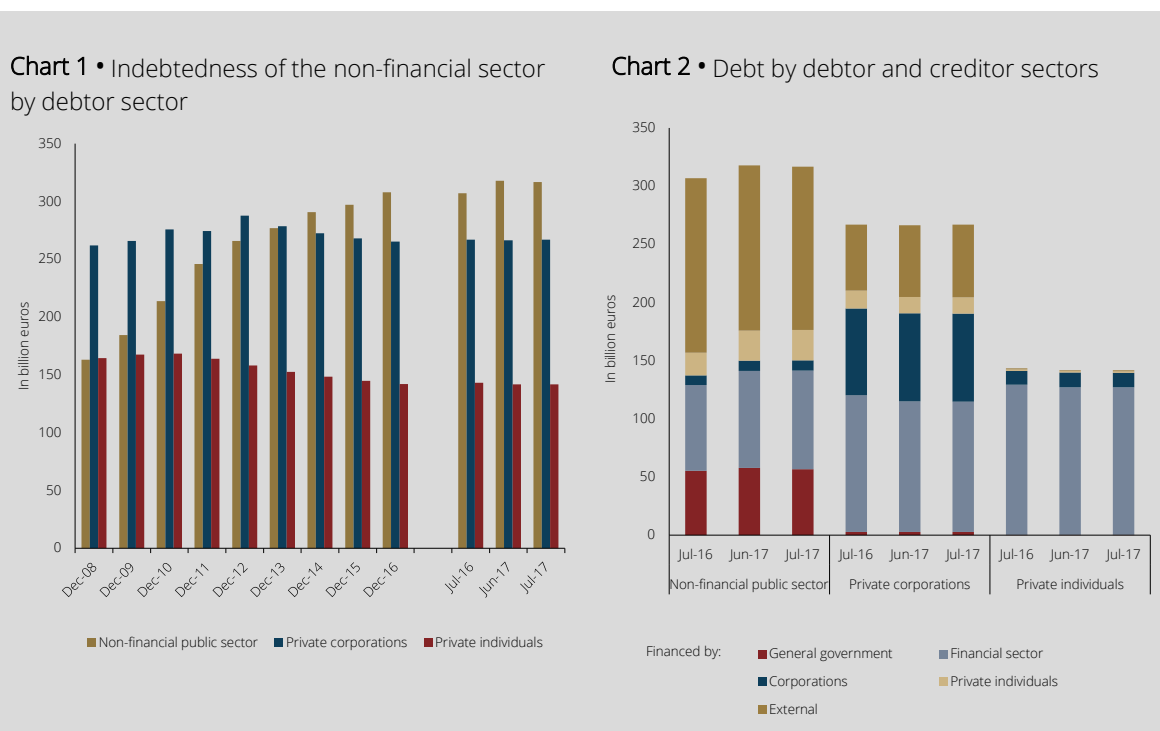

In July 2017, non-financial sector indebtedness stood at €725.4 billion, of which €316.8 billion referred to the public sector and €408.6 billion to the private sector.

Compared with June 2017, public sector indebtedness decreased by €1.0 billion. The private sector indebtedness rose by €0.4 billion (Chart 1).

The decrease in public sector indebtedness was

chiefly due to the decline in financing granted by the non-resident sector and the general government sector. On the other hand, the financing obtained by the public sector from the financial sector increased (Chart 2).

The rise in private sector indebtedness reflected the increase in the external indebtedness of private corporations. This increase was partially offset by a decline in the indebtedness of these entities and households vis-à-vis the resident financial sector.
