

STATISTICAL PRESS RELEASE

12 | 2018

Non-financial sector indebtedness November 2017

22 January 2018

Today, Banco de Portugal publishes statistics, in Table [A.20](#) of the *Statistical Bulletin* and in *BPstat*, on non-financial sector indebtedness for November 2017.

In November 2017 non-financial sector indebtedness stood at €720.8 billion, of which €312.7 billion referred to the public sector and €408.0 billion to the private sector.

Compared with October 2017, non-financial sector indebtedness decreased by €0.6 billion, due to a €1.6 billion fall in public sector indebtedness, partly

offset by a €1.0 billion increase in private sector indebtedness (Chart 1).

The fall in public sector indebtedness resulted in the decrease in external financing and financing granted by the financial sector and households (Chart 2).

The increase in private sector indebtedness was chiefly due to a €0.8 billion increase in external indebtedness of private corporations and a €0.2 billion increase in the indebtedness of households and corporations vis-à-vis the financial sector.
