# Non-financial sector indebtedness May 2018

19 July 2018

Today, Banco de Portugal publishes statistics, in Table [A.20](#) of the *Statistical Bulletin* and in *BPstat*, on non-financial sector indebtedness for May 2018.

In May 2018, non-financial sector indebtedness stood at €724.7 billion, of which €322.4 billion related to the public sector and €402.3 billion to the private sector.

Compared to April 2018, non-financial sector indebtedness increased by €1.0 billion, as a result of a rise of €0.3 billion in public sector indebtedness and €0.7 billion in private sector indebtedness

(Chart 1).

The rise in public sector indebtedness were reflected in an increase in indebtedness vis-à-vis the financial sector, which was partly offset by a decrease in financing from the non-resident sector (Chart 2).

As regards the private sector, there was a €0.5 billion rise in the external indebtedness of corporations. The indebtedness of private individuals increased by €0.2 billion vis-à-vis the financial sector.
