

## Non-financial sector indebtedness June 2018

22 August 2018

Today, Banco de Portugal publishes statistics, in Table A.20 of the *Statistical Bulletin* and in *BPstat*, on non-financial sector indebtedness for June 2018.

At the end of the first half of 2018, non-financial sector indebtedness stood at €721.1 billion, of which €318.0 billion related to the public sector and €403.1 billion to the private sector.

Compared to end-2017, non-financial sector indebtedness increased by €5.3 billion, reflecting a rise in public sector indebtedness. The indebtedness of the private sector decreased (€0.1 billion), as a result of a €0.6 billion decline in

corporate indebtedness and a €0.5 billion rise in financing from private individuals (Chart 1).

The rise in public sector indebtedness was recorded by all institutional sectors, in particular by the financial sector (€2.9 billion) (Chart 2).

Developments in private sector indebtedness reflect a €1.4 billion decrease in financing obtained by corporations from the rest of the world, partly offset by a rise in the indebtedness of corporations and private individuals from the financial sector (€1.1 and €0.3 billion respectively).
