69 | 2018

Securities issues May 2018

12 July 2018

Today, Banco de Portugal publishes statistics, in Table [A.25](#) of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for May 2018.

In May 2018 net issues (gross issues minus redemptions) of securities by residents totalled €0.9 billion. This amount is mainly accounted for by positive net issues of shares, worth €0.7 billion (Chart 1).

By institutional sector, the non-financial corporate sector stood out, recording positive net issues of €0.8

billion, the highest value in the series since May 2017 (Chart 2).

The outstanding amount of securities issued by residents totalled €465.1 billion (Chart 3), decreasing by €1.4 billion from April 2018. This decrease was mainly due to the devaluation of general government debt securities, worth €3.0 billion, which more than offset positive net issues in the month (Chart 4).
