

STATISTICAL PRESS RELEASE

77 | 2018

Securities issues

June 2018

9 August 2018

Today, Banco de Portugal publishes statistics, in Table [A.25](#) of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for June 2018.

In the first half of 2018, net issues (gross issues minus redemptions) of securities by residents totalled €7.0 billion. This amount is mainly accounted for by positive net issues of debt securities, worth €5.2 billion (Chart 1).

By institutional sector, the general government stood out, recording positive net issues of €5.3 billion (Chart 2). Conversely, non-financial corporations recorded negative net issues of €0.2 billion.

At the end of the first half of 2018, the outstanding amount of securities issued by residents totalled €463.6 billion (Chart 3), as a result of an increase of €8.0 billion compared with the previous six-month period. In addition to the contribution of net issues by the general government, the non-financial corporate sector stood out, with an increase of €2.1 billion explained by a valuation of securities, which more than offset the negative net issues of this six-month period (Chart 4).

Chart 1 • Securities issues, by instrument | net issues

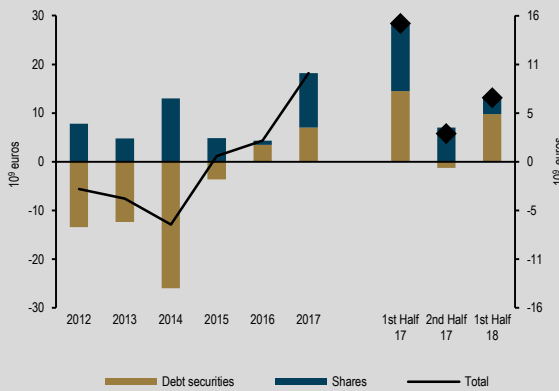

Chart 2 • Securities issues, by institutional sector | net issues

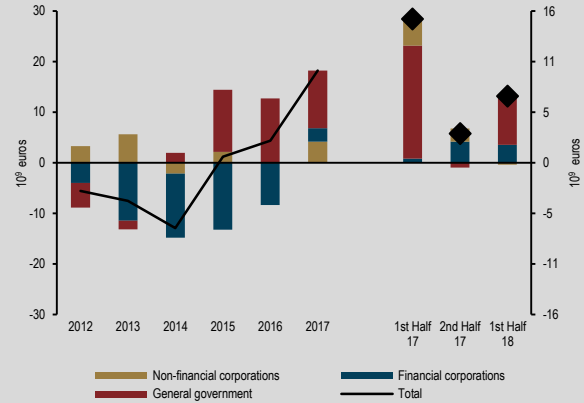

Chart 3 • Securities issues, by instrument | end-of-month outstanding amount

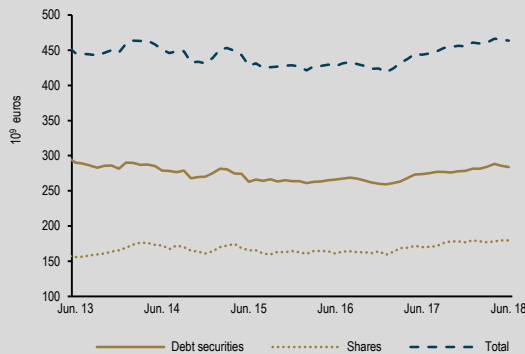

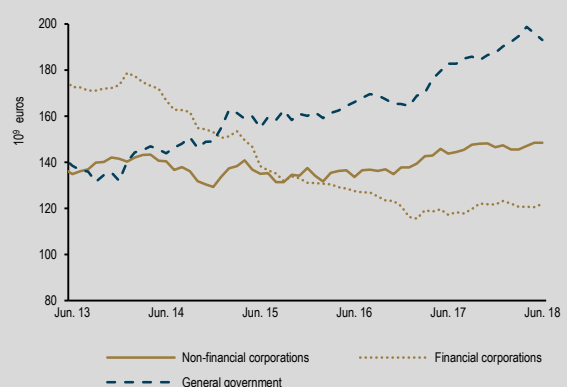

Chart 4 • Securities issues, by institutional sector | end-of-month outstanding amount
