Securities issues July 2018

13 September 2018

Today, Banco de Portugal publishes statistics, in Table [A.25](#) of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for July 2018.

In July 2018 net issues (gross issues minus redemptions) of securities by residents totalled €0.4 billion. This amount is mainly accounted for by positive net issues of debt securities, worth €0.3 billion (Chart 1).

By institutional sector, the general government stood out, as the only sector with positive net issues, amounting to

€1.2 billion. The other sectors of the economy posted negative net issues, totalling €0.8 billion (Chart 2).

The outstanding amount of securities issued by residents totalled €465.4 billion (Chart 3), up by €1.8 billion from June 2018. In addition to the aforementioned positive net issue, this increase was mostly due to the valuation of shares issued by non-financial corporations and debt securities issued by the general government (Chart 4).
