2 October 2017

Today, Banco de Portugal publishes statistics, in Table [A.15](#) of the *Statistical Bulletin* and in *BPstat*, on public debt for August 2017.

In this period, public debt stood at €250.4 billion (Chart 1), an increase of €1.3 billion from the end of July (Chart 2). This change reflects net issues of securities of €2.4 billion and a decrease in loans of

€1.2 billion, chiefly due to the early repayment of IMF loans (€0.8 billion).

Assets in central government deposits increased by €3.0 billion. Therefore, the public debt net of central government deposits decreased by €1.7 billion from the previous month, totalling €228.4 billion.
