

## STATISTICAL PRESS RELEASE

24 | 2017

### Securities issues January 2017

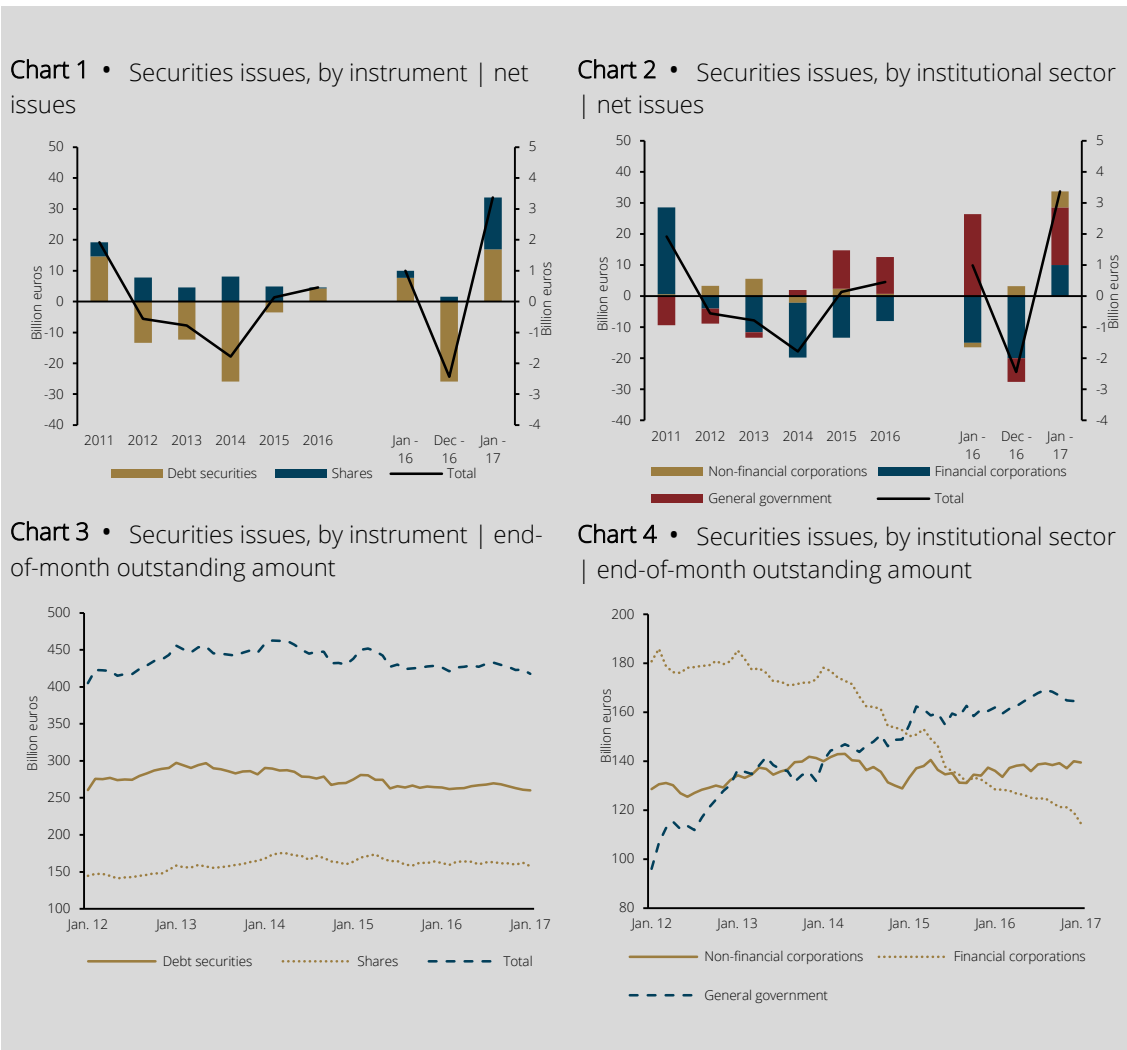

9 March 2017

Banco de Portugal publishes statistics today, in Table A.25 of the *Statistical Bulletin* and in BPstat, on shares and debt securities issues for January 2017.

In January, net issues of securities (gross issues minus redemptions) by resident entities attained €3.4 billion (Chart 1). Net issues were positive for all sectors of the economy (Chart 2), which was not the case since December 2015.

Despite positive net issuance, the outstanding amount of securities issued by resident entities reached the lowest value for the series since July 2012, totalling €417.7 billion (Chart 3), as a result of a loss in value in January that was broadly based across all issuing sectors.

Public debt securities stood out in January 2017, with the highest loss in value since June 2015.
