

STATISTICAL PRESS RELEASE

56|2017

Securities issues April 2017

8 June 2017

Today, Banco de Portugal publishes statistics, in Table [A.25](#) of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for April 2017.

In April, net issues (gross issues minus redemptions) of securities by residents totalled €3.4 billion, triggered by net issues of debt securities amounting to €3.0 billion, the highest level since January 2014 (Chart 1).

By institutional sector, net issues by the general government amounted to €3.8 billion, of which €1.0 billion refer to variable income Treasury bonds (Chart 2).

In April, the balance of securities issued by residents was €437.6 billion, which corresponds to an increase of €5.4 billion from the previous month (Chart 3). The balance of securities issued by the general government attained €175.8 billion, corresponding to the highest value in the series (Chart 4). This increase was due not only to the above-mentioned positive net issues, but also to the greater monthly valuation of public debt securities observed since July 2015, by approximately €2.3 billion.
