

## STATISTICAL PRESS RELEASE

68|2017

### Securities issues

May 2017

13 July 2017

Today, Banco de Portugal publishes statistics, in [Table A.25](#) of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for May 2017.

In May, net issues (gross issues minus redemptions) of securities by residents totalled €1.7 billion, mainly triggered by net issues of debt securities amounting to €1.6 billion (Chart 1). Three institutional sector had positive net issues (Chart 2).

The balance of securities issued by residents was €444.8 billion, which corresponds to an increase of €7.3 billion when compared with April (Chart 3). The balance of securities issued by the general government attained €179.4 billion, corresponding to a new peak in the series (Chart 4). This increase was largely due to the valuation of public debt securities by approximately €3.2 billion, which corresponds to the highest monthly valuation since July 2015.

Chart 1 • Securities issues, by instrument | net issues

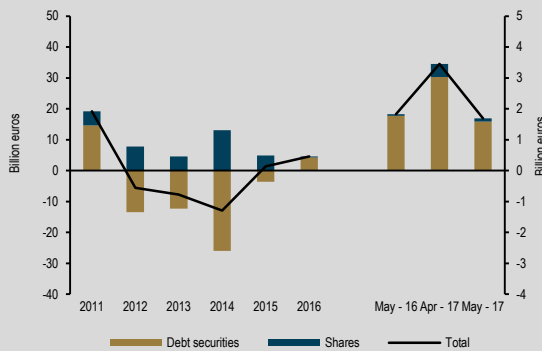

Chart 2 • Securities issues, by institutional sector | net issues

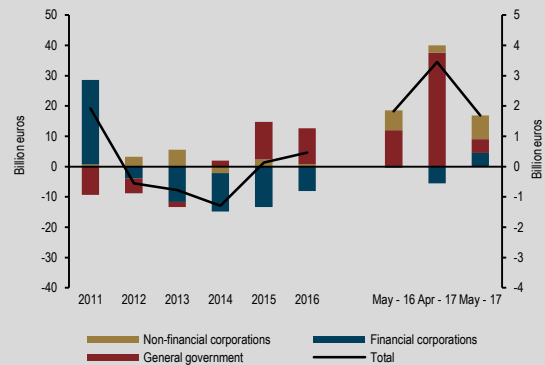

Chart 3 • Securities issues, by instrument | end-of-month outstanding amount

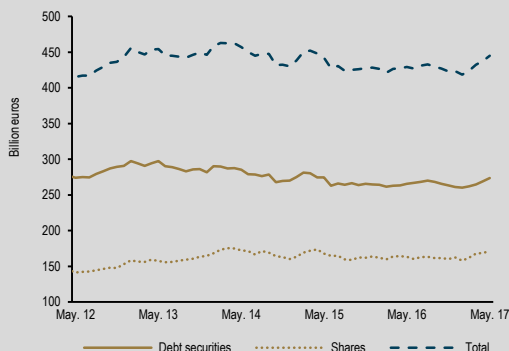

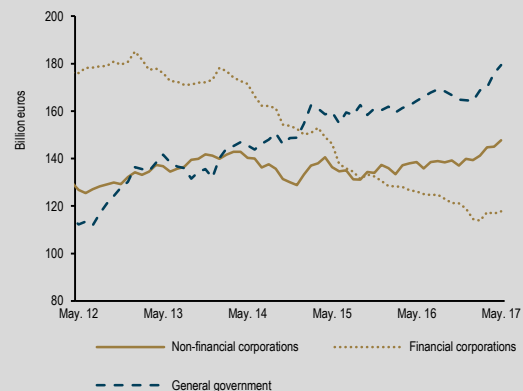

Chart 4 • Securities issues, by institutional sector | end-of-month outstanding amount
