

## STATISTICAL PRESS RELEASE

79 | 2017

### Securities issues

June 2017

10 August 2017

Today, Banco de Portugal publishes statistics, in Table A.25 of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for June 2017.

In the first half of the year, net issues (gross issues minus redemptions) of securities by residents totalled €15.1 billion, the highest level since the first half of 2011 (Chart 1). In particular, the general government sector made the highest contribution to this development, with net issues of securities amounting to €11.8 billion (Chart 2). The other sectors also had positive net issues.

In the first half of 2017, the balance of securities issued by residents was €443.5 billion, which corresponds to an increase of €19.9 billion from the end of 2016 (Chart 3). The general government sector registered a new peak in its series, totalling €182.4 billion (Chart 4). This increase was due not only to the above-mentioned positive net issues, but also to the greater half-yearly valuation of public debt securities observed since the first half of 2014, to the amount of €5.9 billion.

**Chart 1 • Securities issues, by instrument | net issues**

**Chart 2 • Securities issues, by institutional sector | net issues**

**Chart 3 • Securities issues, by instrument | end-of-month outstanding amount**

**Chart 4 • Securities issues, by institutional sector | end-of-month outstanding amount**
