Securities issues August 2017

12 October 2017

Today, Banco de Portugal publishes statistics, in Table [A.25](#) of the *Statistical Bulletin* and *BPstat*, on issues of debt securities and shares for August 2017.

In August 2017, net issues (gross issues minus redemptions) of securities by residents totalled €2.2 billion, almost entirely explained by net issues of debt securities (Chart 1).

By institutional sector, the general government sector was the most notable, with net issues of securities amounting to €2.3 billion (Chart 2). In that month, the financial sector

was the only sector with negative net issues to the amount of €0.2 billion.

The outstanding amount of securities issued by residents totalled €448.5 billion, with positive increase of €2.7 billion compared with the previous month (Chart 3). These increase were due, in addition to the aforementioned positive net issues, to the valuation of shares issued by non-financial corporations. The outstanding amount of government debt securities peaked again, at €184.9 billion, which corresponded to a €2.3 billion change from the previous month (Chart 4).
