

STATISTICAL PRESS RELEASE

119 | 2017

Securities issues

October 2017

14 December 2017

Today, Banco de Portugal publishes statistics, in [Table A.25](#) of the *Statistical Bulletin* and in *BPstat*, on issues of debt securities and shares for October 2017.

In October 2017, net issues (gross issues minus redemptions) of securities by residents totalled €-1.0 billion. This is mainly explained by net redemptions of debt securities, amounting to €2.8 billion, partly offset by net issues of shares totalling €1.8 billion (Chart 1).

By institutional sector, the general government sector was the most notable, with net redemptions of

securities amounting to €3.2 billion (Chart 2), corresponding, in terms of net issues, to the lowest level in the series since October 2014. Most important in the financial corporate sector were net issues of shares totalling €1.7 billion.

The outstanding amount of securities issued by residents totalled €453.9 billion, increasing by €1.2 billion from September 2017. This increase was largely due to the valuation of public debt securities, which more than offset net redemptions (Chart 3).
