Socio-economic indicators of Portuguese-speaking Countries Community in charts

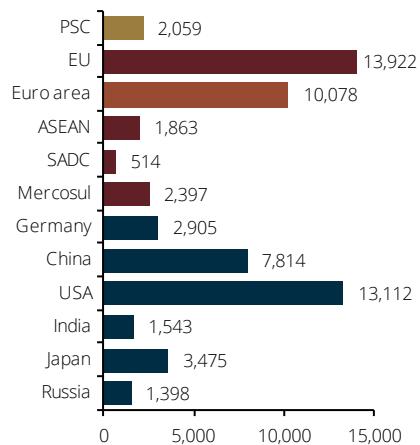

Land area | Thousand km²

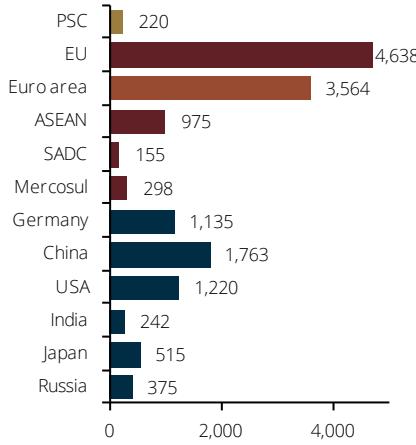

Population | Millions, 2014

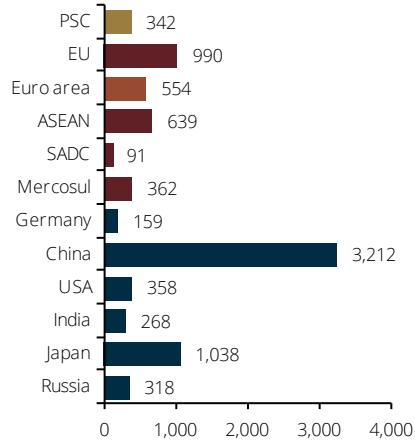

GDP | EUR, billions, current prices, 2014

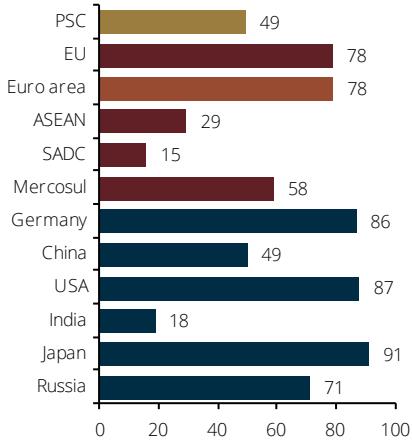

Exports | Goods, EUR, billions, 2014

Foreign reserves | EUR, billions, 2014

Internet | Users, as a percentage of total population, 2014

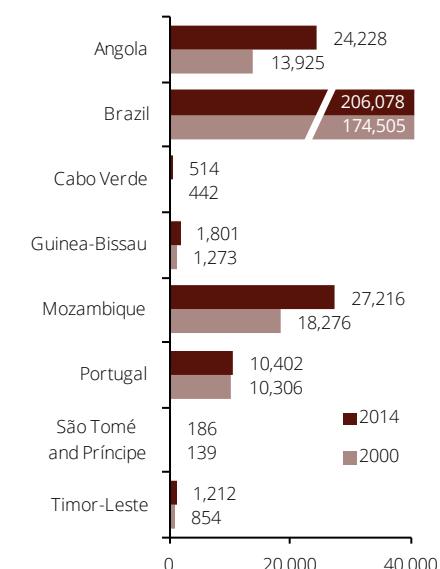

Note: Includes intra-community exports.

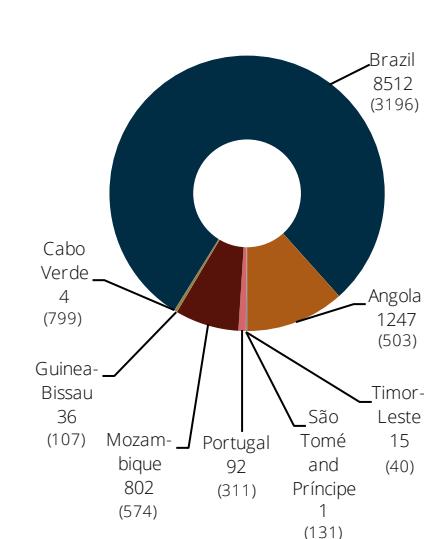

Key to the charts: PSC – Portuguese-Speaking Countries (Angola, Brazil, Cabo Verde, Guinea-Bissau, Mozambique, Portugal, São Tomé and Príncipe, Timor-Leste); ASEAN – Association of Southeast Asian Nations (Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Vietnam); Mercosul (Argentina, Brazil, Paraguay, Uruguay, Venezuela); SADC – Southern African Development Community (Angola, Botswana, Democratic Republic of the Congo, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, South Africa, Swaziland, Tanzania, Zambia, Zimbabwe); EU – European Union (Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom); Euro area (Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia, Spain).

Portuguese-speaking Countries in charts

Population | Thousands

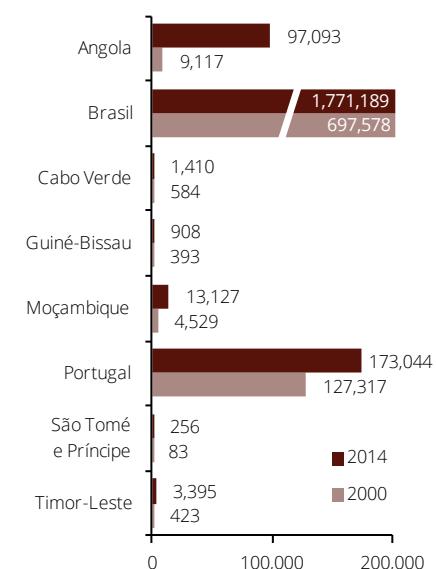

Land area | Thousand km²

Gross Domestic Product |

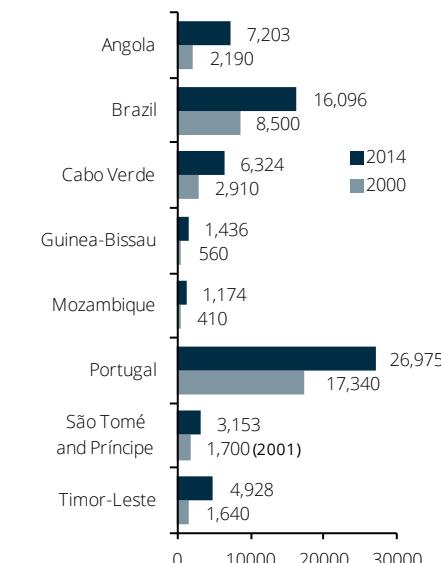

EUR, millions, current prices

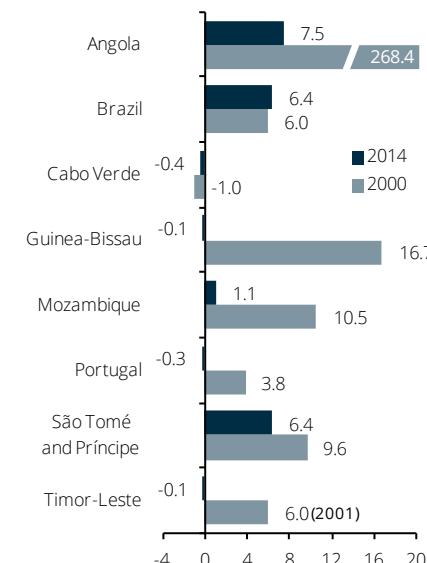

Note: Figures in brackets refer to the area of the respective Exclusive Economic Zone.

Note: Figures for Timor-Leste include oil revenues.

GDP per capita | USD, in PPP, current prices

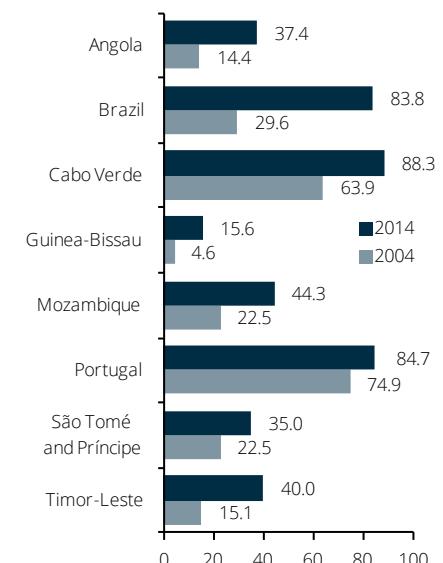

Inflation | Consumer Price Index, year-on-year percentage change

Bank deposits |

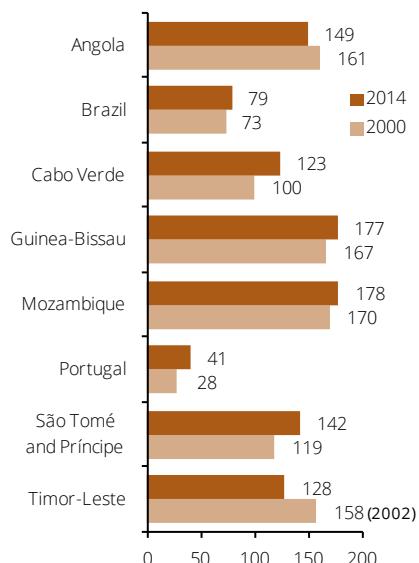

As a percentage of GDP

Note: PPP – Purchasing power parity. A form of currency conversion alternative to market rates. It rests on the comparison of prices in local currency for the same representative basket of goods in different countries (to establish a parity between the purchasing power of the same amount of currency in each country). Frequently used in international comparisons.

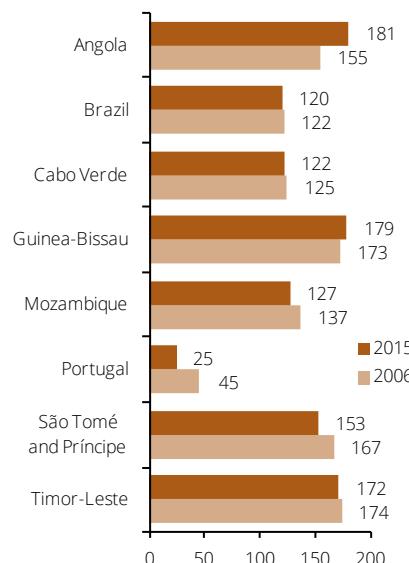

Portuguese-speaking Countries in charts

Human development index |
Ranking position

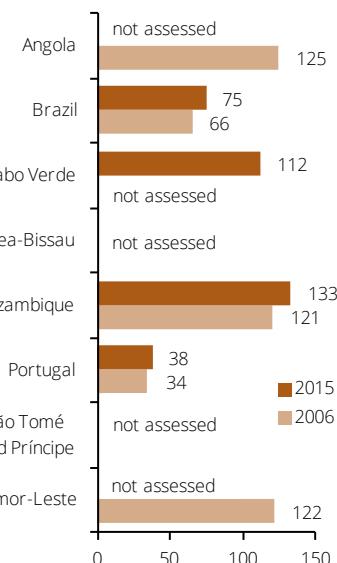

Note: Human Development Index: composite indicator calculated by the United Nations Development Programme (UNDP), which takes into account life expectancy, educational attainment and income (1: maximum – 175: minimum in 2000; 1: maximum – 187: minimum in 2014).

Business environment |
Ranking position

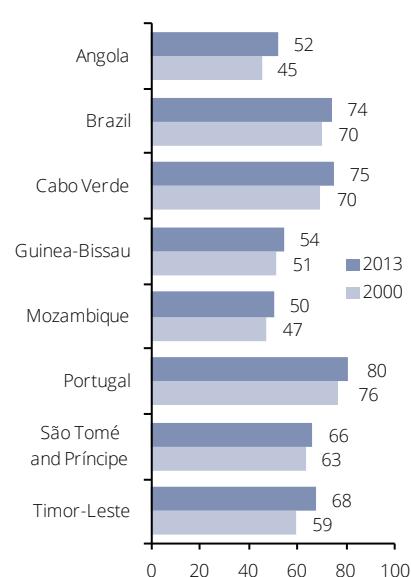

Note: Doing Business Indicators: range of indicators relevant to the business environment regulatory framework, compiled by the World Bank. A composite indicator is calculated to encapsulate the overall quality of the business environment in each country (1: maximum – 175: minimum in 2006; 1: maximum – 189: minimum in 2015).

Global competitiveness |
Ranking position

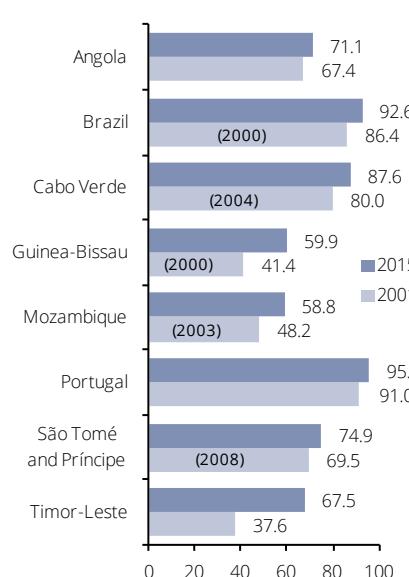

Note: Global Competitiveness Indicator: composite indicator calculated by the World Economic Forum, which encapsulates a wide set of macroeconomic and structural indicators seen as relevant for measuring competitiveness (1: maximum – 125: minimum in 2006; 1: maximum – 144: minimum in 2015).

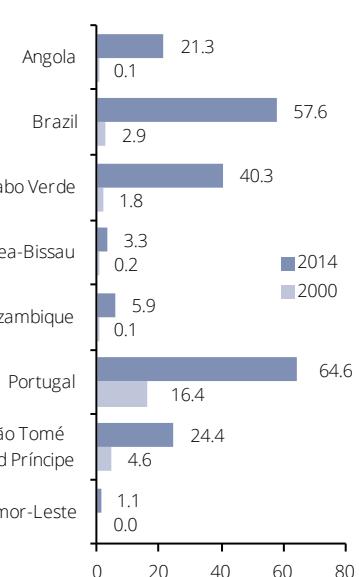

Life expectancy | At birth, years

Literacy rate | Adult population (15+) able to read and write, as a % of total population

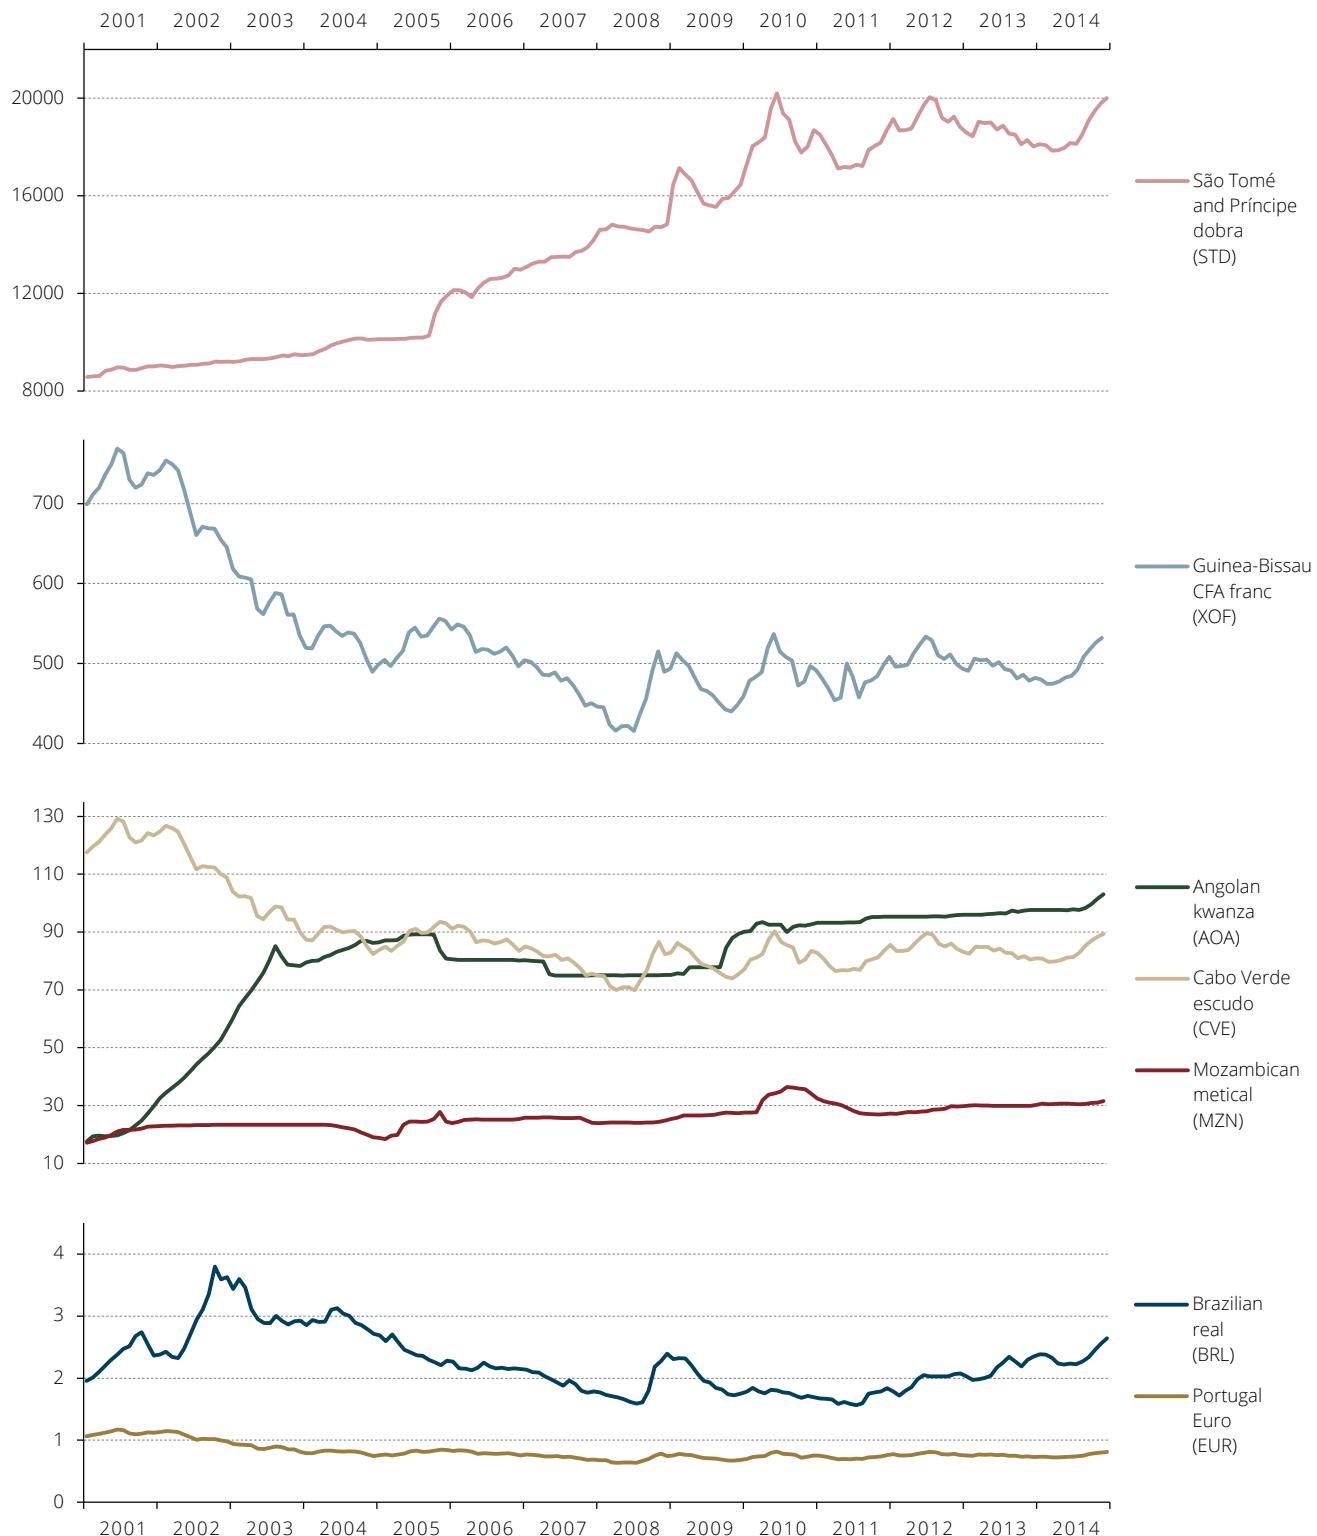

Internet | Users, as a percentage of total population

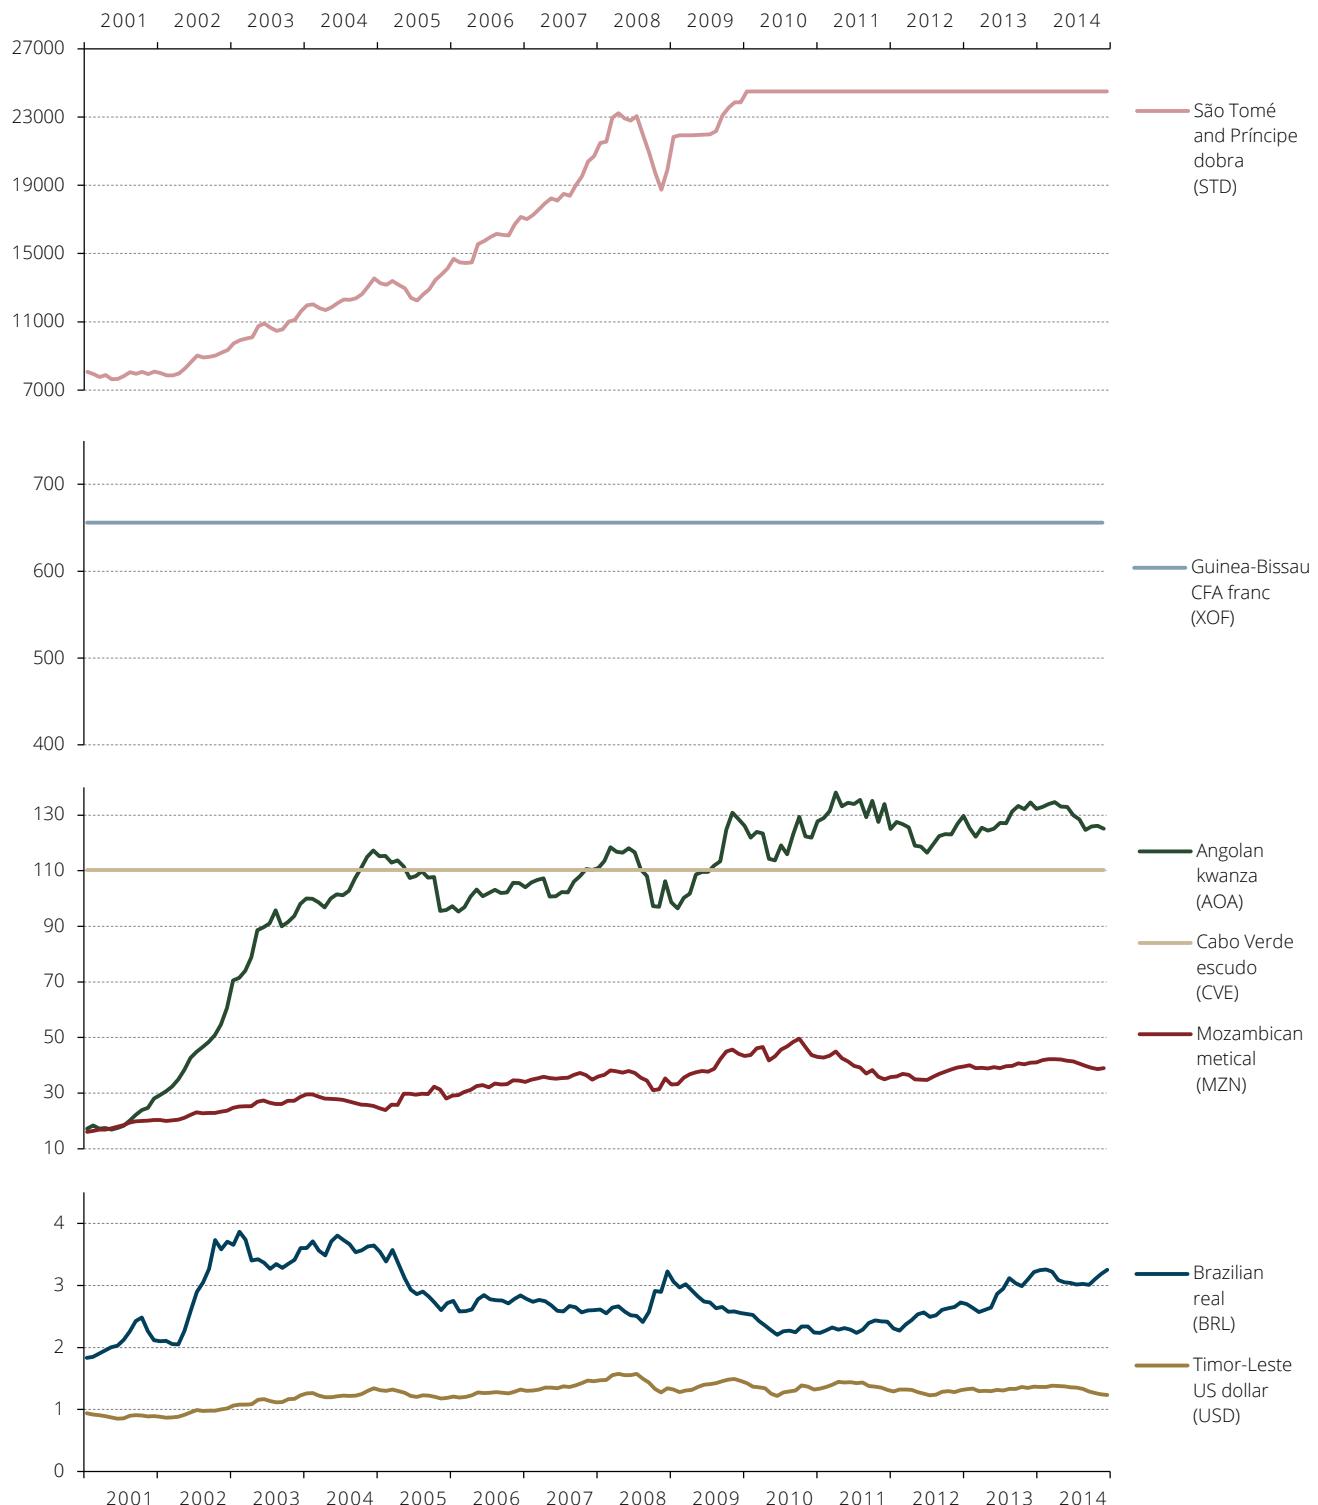

Exchange Rates of Portuguese-speaking Countries

Average monthly rates against USD

Exchange Rates of Portuguese-speaking Countries

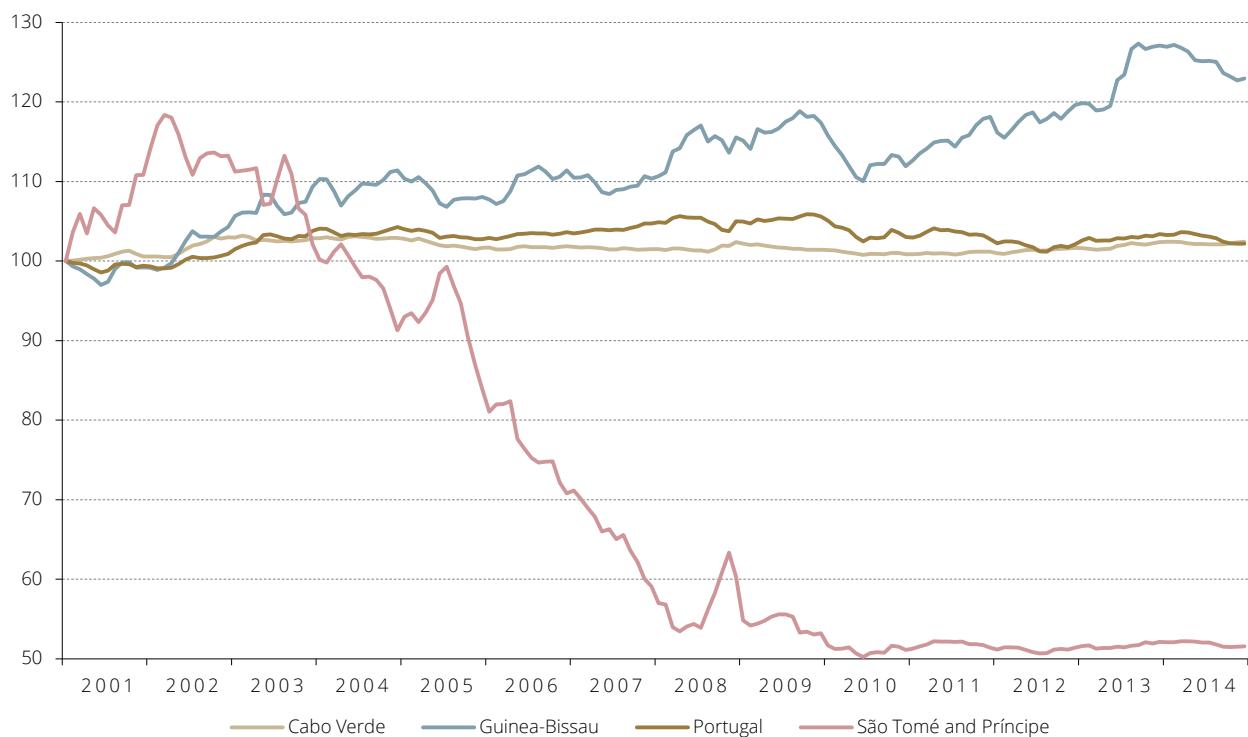

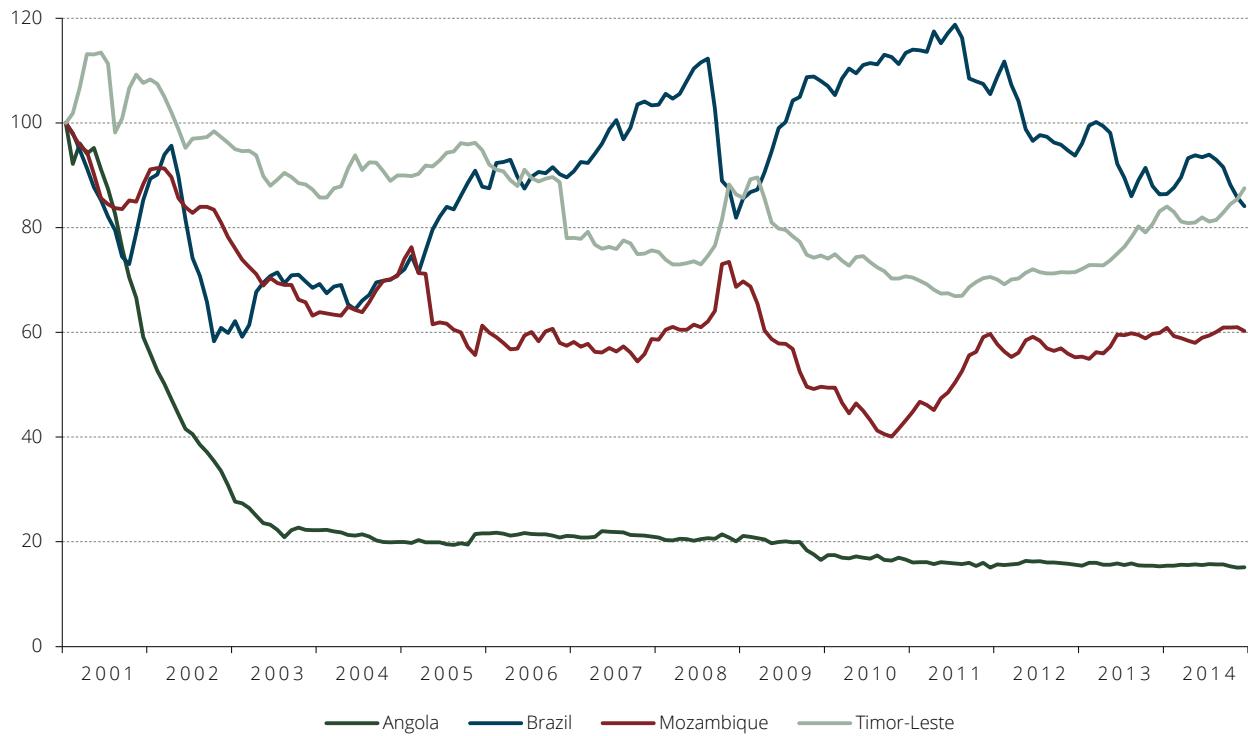

Average monthly rates against EUR

Exchange Rates of Portuguese-speaking Countries

Nominal effective rates

(index 100: january 2001)

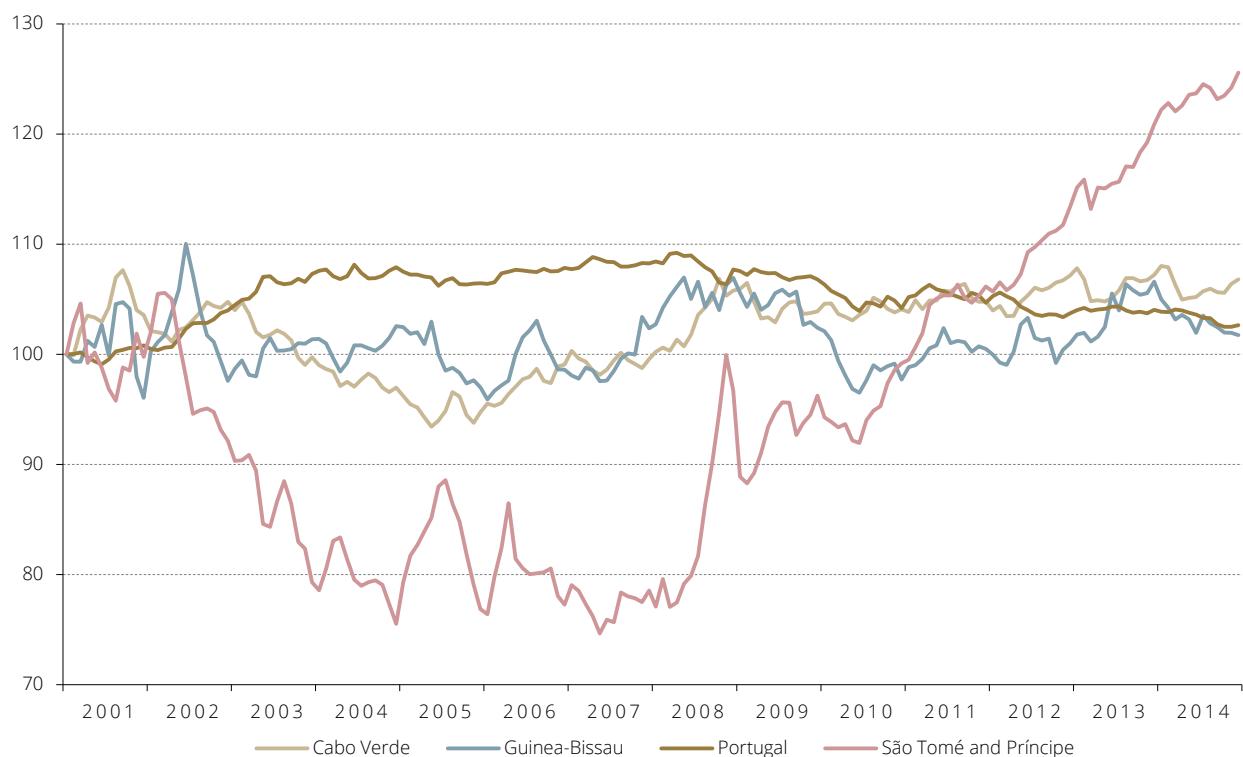

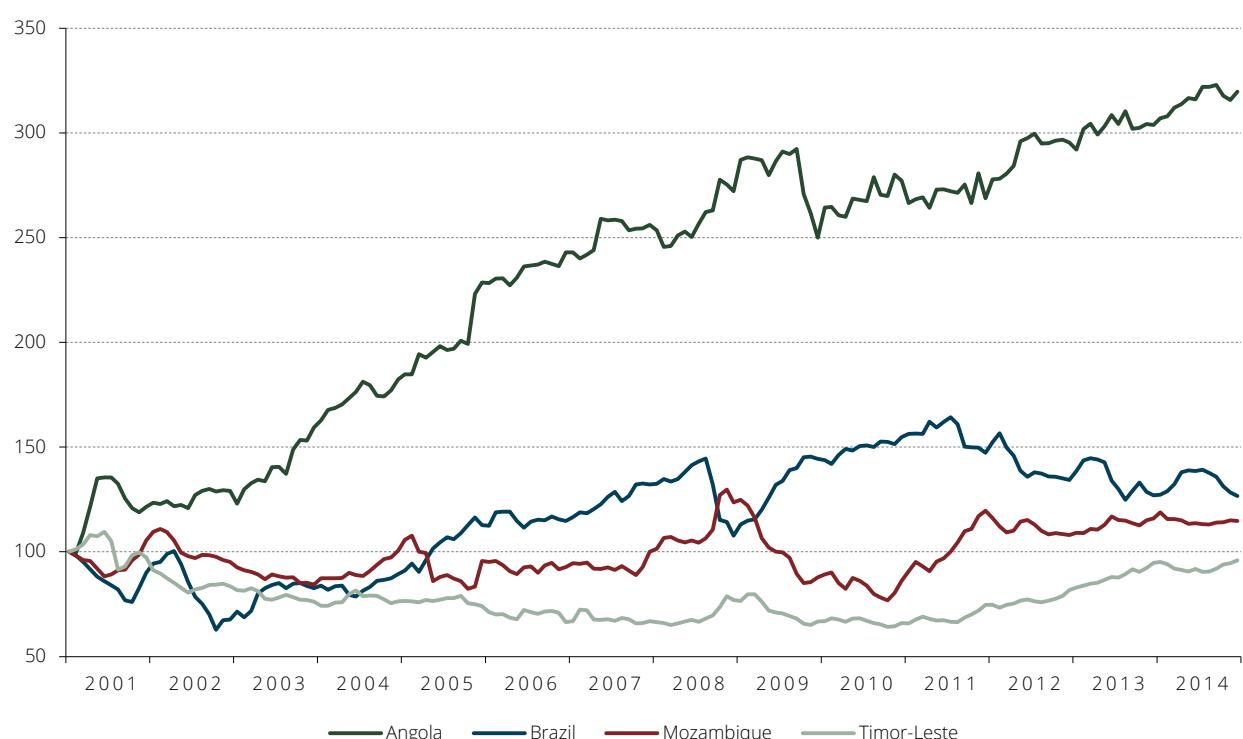

Note: The nominal effective exchange rate index is a geometric weighted average of the bilateral exchange rates against the currencies of the main trading partners, in which the weightings reflect the relative importance of each partner. An increase / decrease in the value of the index corresponds to an appreciation / depreciation of the respective currency.

Exchange Rates of Portuguese-speaking Countries

Real effective rates

(index 100: january 2001)

Note: The real effective exchange rate index takes into account the effects of appreciation / depreciation of currencies using inflation differentials in the various trading partners, and is calculated as the product of the nominal effective exchange rate and a weighted average (with the same weightings) of relative prices (of the partners compared with domestic prices). An increase / decrease in the value of the index corresponds to an appreciation / depreciation of the respective currency.
