Flags for ISFF 2013

Coding:

0   Not applicable (i.e. skipped due to routing)

1   Recorded as collected, complete observation

11   Recoded from collected verbatim text response

12   Answer could be determined without asking the question (question was not asked to the respondent)

13   Value transformed from collected answers to national questionnaire (output harmonisation)

71   Value taken from (statistical, fiscal or other) register

1050   Not imputed, originally "Don't know"

1051   Not imputed, originally "No answer"

1052   Not imputed, originally not collected due to missing answer to a previous question (i.e. originally missing due to higher order missing data)

1053   Not imputed, originally collected from a range or from brackets

1054   Not imputed, collected value deleted (considered incorrect or unreliable)

1055   Not imputed, value not collected due to a CAPI or interviewer error

1056   Not imputed, value missing due to editing of parent variable

2050   Missing, set as missing for anonymisation purposes

2051   Missing, set as missing because data were not collected

3050   Edited, set to modified value as considered incorrect or unreliable

4050   Imputed, originally "Don't know"

4051   Imputed, originally "No answer"

4052 Imputed, originally not collected due to missing answer to a previous question (i.e. originally missing due to higher order missing data)

4053 Imputed, originally collected from a range or from brackets

4054 Imputed, collected value deleted (considered incorrect or unreliable)

4055 Imputed, value not collected due to a CAPI or interviewer error

4056 Imputed, value missing due to editing changes in the data

5050 Estimated, originally not collected
