

Flags for ISFF 2017

Coding:

- 0** Not applicable (i.e. skipped due to routing)
- 1** Recorded as collected, complete observation
- 11** Collected from verbatim text response
- 12** Answer could be determined without asking the question (question was not asked to the respondent)
- 13** Value transformed from collected answers to national questionnaire (output harmonisation)
- 71** Value taken from (statistical, fiscal or other) register.
- 1050** Not imputed, originally “Don’t know”
- 1051** Not imputed, originally “No answer”
- 1052** Not imputed, originally not collected due to missing answer to a previous question (i.e. originally missing due to higher order missing data)
- 1053** Not imputed, originally collected from a range or from brackets
- 1054** Not imputed, collected value deleted (considered incorrect or unreliable)
- 1057** Not imputed, value not collected due to a CAPI or interviewer error or to editing of parent variable
- 2050** Missing, set as missing for anonymisation purposes
- 2051** Missing, set as missing because data was not collected
- 3050** Edited, set to modified value as considered incorrect or unreliable
- 4050** Imputed, originally “Don’t know”
- 4051** Imputed, originally “No answer”

- 4052** Imputed, originally not collected due to missing answer to a previous question (i.e. originally missing due to higher order missing data)
- 4053** Imputed, originally collected from a range or from brackets
- 4054** Imputed, collected value deleted (considered incorrect or unreliable)
- 4057** Imputed, value not collected due to a CAPI or interviewer error or to editing of parent variable
- 5050** Estimated, originally not collected
