

Household Finance and Consumption Survey 2013

30% OF HOUSEHOLDS HAD LOANS THAT USED THE MAIN RESIDENCE AS COLLATERAL

In the second quarter of 2013:

- The median net wealth held by households living in Portugal was 71.2 thousand euros;
- The median net wealth of the 10% top income households was 9.8 times the wealth of the 20% bottom income group;
- The median net wealth increased with age up to 64 years and the level of education attained; it was higher for households where the reference person was self-employed;
- The value of non-financial assets accounted for 88% of total assets held by households;
- The household residence was the main non-financial asset, both in number of owners and in value;
- Saving deposits were the main financial asset in terms of value;
- About 30% of households had loans that used the household residence as collateral; this was the main type of debt held by households.
